

ABOUT DARPOL COMPANY

Darpol company leads activity since 1998, initially as a Stalex S.C., after 2003 as Darpol.

The company provides services in the field of:

doing and assembling constructions of halls and publics as shops, markets also constructions of residential buildings; delivery, assembly and full maintenance of VAHLE systems used for powering the EHB technological transport; designing, implementation, modernization and assembly of steel constructions and elements of steel; delivery and assembly of varied crane facilities: cranes, hoists, overhead cranes; locational changes of industrial equipment and machinery along with restarting; abrasive blasting - purification of elements of steel structures and building constructions (renovation of existing steel structures).

KOEGO PEGS

Pins Koego are used for connecting steel with each class of concrete.

They shall apply to the implementation of monolithic and prefabricates, especially the bridge ones.

These pins are attached to the steel substrate using ceramic rings or in the shielding gas, using the appropriate welding machines and gun shots.

The stainless and threaded bolts are also available.

VAHLE BUSWAYS

The scope of services of the Darpol Co. are also the deliveries and assemblies of monopolar and multipolar VAHLE busways.

These are used to power machinery, equipment, gantry cranes and to the power of technological transport - based on Electro Hydraulic Brake system in cars.

SALE OF STEEL

The DARPOL company in its 14 years of activity extended the scope of the sale of steel in bulk quantities.

In its commercial offer it has:

Sheets in the species S 235 and S 355 also steel sheets formats as follows: 1000x2000, 1250x2500, 1500x3000 and 2000x6000

**Copper and titanium
- zink sheets**

Smooth and strips rods,
simple and in coils

**Square and rectangular
hollow sections**

SALE OF STEEL

Steel pipes and saddle pressure pipes of any diameters

I-sections for the IPE, HEA division, HEB steel constructions

Equal and unequal steel angles of different prints and wall thicknesses

The Company provides services of the thermal firing of sheets 8 to 150 mm on the thermal contour band saws **VANAD**.

STEEL CONSTRUCTIONS

The Darpol Co. offers complete implementation of various kinds of steel structures, regardless of the complexity, based on the documentation of an investor or own one.

The offer:

industrial halls,
steelwork of industrial machinery and industrial equipment,
industry objects - manufacture and assembly.
